### Full stack developer

Pinhão Tecnologia (Brazil) 03/2019 - 07/2024

Senior Full Stack Developer at Pinhão Tecnologia, where I advanced from front-end intern to leading high-impact projects in web, mobile, and embedded systems. Actively contributed across the entire software development lifecycle, from UI/UX design in Figma to deployment with CI/CD, applying Agile methodologies (Scrum/Kanban). Developed 15+ end-to-end solutions, including web platforms with PHP (Laravel, Doctrine ORM) and backend services with Java (Spring Boot, Hibernate/JPA). Designed and implemented secure, scalable RESTful APIs, published mobile applications built with Flutter (Dart) on App Store and Google Play, and built real-time integrations with Firebase and SQLite. Additionally, contributed to process automation using Arduino and Raspberry Pi. Key Projects: Corretágil, SyncApp, Coolz, and Blkards – optimizing performance and user experience. Strengthened a versatile technical profile with expertise in Java, microservices, DevOps, and scalable solutions for digital transformation projects. Tech Stack: Java (Spring Boot, Hibernate/JPA), PHP (Laravel), Flutter (Dart), RESTful APIs, MySQL, PostgreSQL, Firebase, HTML5, CSS3, JavaScript, Figma, CI/CD.
